Screen Shots

Illustration 1: Your TYPO3 website after installing the Job Market Template. You can use it without the Job Market extension.

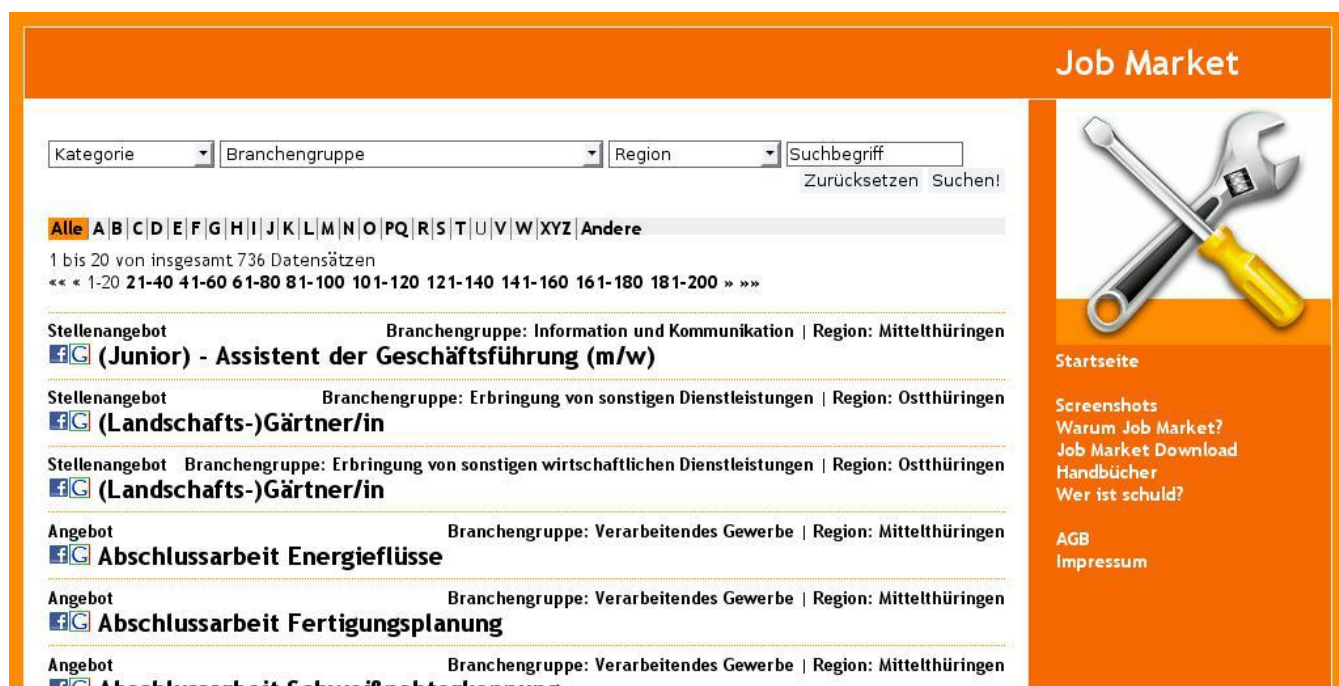

Illustration 2: Your TYPO3 website after installing the Job Market Template and the extension Job Market

Introduction

What does it do?

- Job Market Template is a template for the Job Market.
- Job Market Template is useful,
 - if you will start with Job Market, but you don't have a designed TYPO3 installation,
 - if you want a full designed website very quick, but have no time for building an own template.
- You can use Job Market Template for any website and without the extension Job Market.
- If you like, you can change everything
 - HTML
 - CSS
 - TypoScript
- You don't need to be an experienced TYPO3 user.

What does it not do?

- If you like a very different layout than Job Market Template, it isn't useful to install it.

Installation

Extension Manager

Open the extension manager, download the extension Job Market Template (extkey: base_jobmarket) and install it.

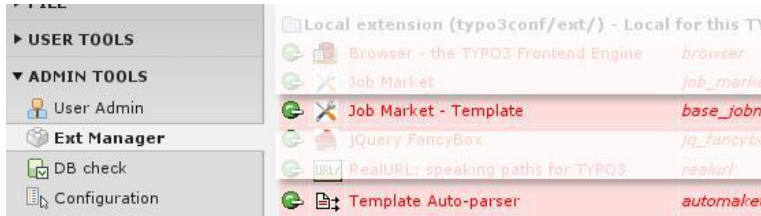

Illustration 3: Both extensions after installation

1. Job Market Template depends on Template Auto-parser (automakemtemplate). Please install this extension too.
2. Install Job Market Template
3. If you like "RealURL: speaking paths for TYPO3 (realurl)" please install it too.

Backend Group

Create a new backend user group.

1. Modul: Web > List
2. Page tree: root item (here: TYPO3 Job Market)
3. Edit area: Backend usergroup
4. Tab [General], Field "Grouptitle": quick_shop

Pages

Create a page tree

1. Modul: Web > List
2. Page tree: root item (in the illustration below: Browser - die TYPO3-Frontend-E...)
3. Edit area: Create new page - Page (inside)
4. Create a page list (sysfolders) like in the illustration below

- Browser - die TYP03-Frontend-E...
 - Job Market
 - Job Market - Jobs [sysfolder]
 - Libraries [sysfolder]
 - header
 - footer

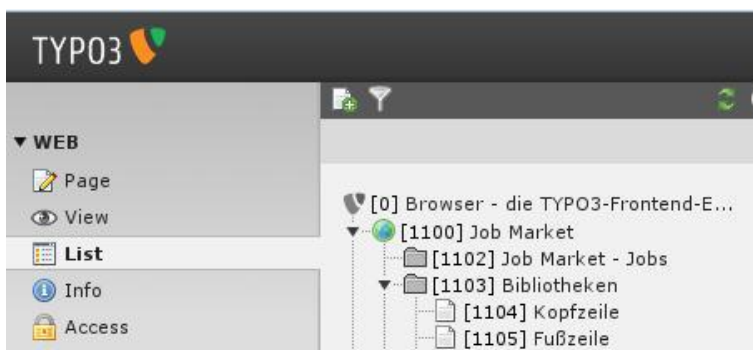

Illustration 4: Page tree

Page Configuration

Page Job Market

We like the backend user group "Job Market" as the default group for new pages. Every backend user with the group "Job Market" will have full access to this pages.

If the id of the backend user group "Job Market" is 1, than copy the code from below to the tsConfig field of the root page without any changing.

```
TCMAIN {
    permissions {
        // 1: job_market
        groupid = 1
        group   = show,edit,delete,new,editcontent
    }
}
```

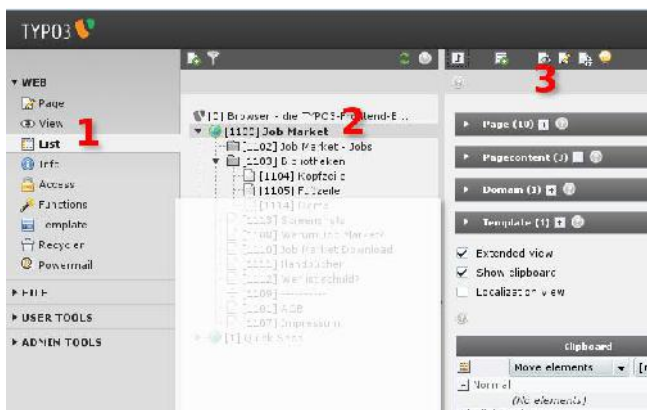

Illustration 5: Edit the page properties

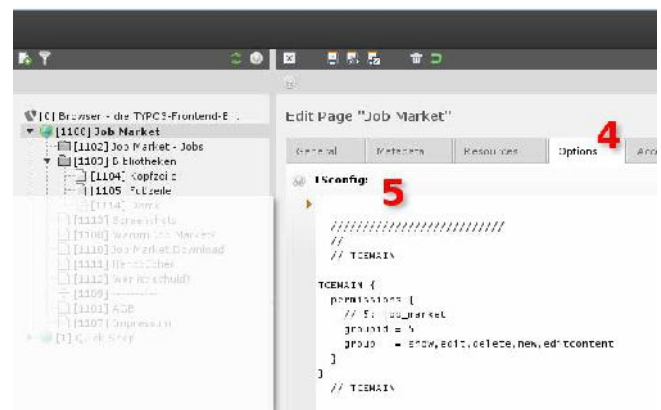

Illustration 6: Add the TS configuration

1. Modul: Web > List
2. Page tree: Job Market
3. Edit area: Edit page properties (click on the sheet with the pen on the top of the area)
4. Select tab [Options]
5. Paste the code snippet from above to the field "Tsconfig".

Job Market - Jobs (sysfolder)

Please repeat the steps from the page "Job Market" with the code snippet below for the sysfolder "Job Market - Jobs"

```
TCMAIN {
    clearCacheCmd = pages
}
```

The code above effects, that all pages will be removed from the TYPO3 cache, if job data changes.

Header and Footer

Repeat the step "Job Market - Jobs (sysfolder)" for the pages Header and Footer in the Sysfolder.

TypoScript

Page Job Market

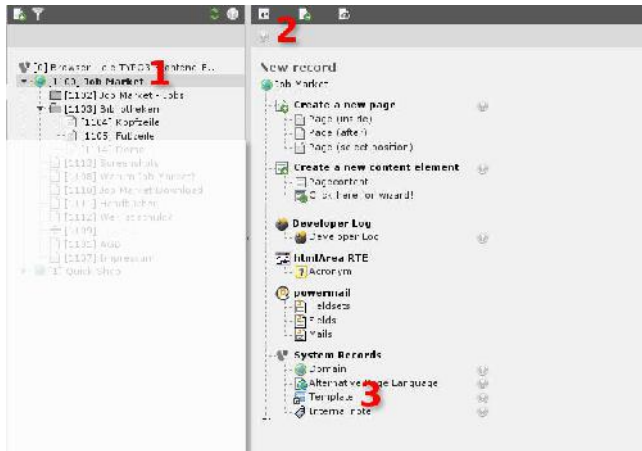

Illustration 7: Add a TypoScript template

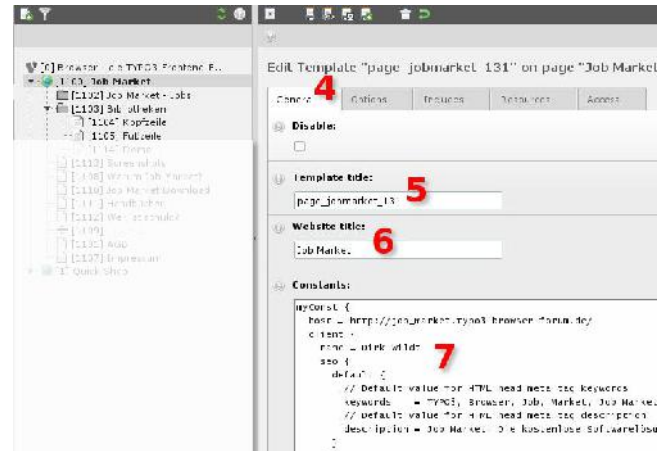

Illustration 8: TypoScript tab [General]

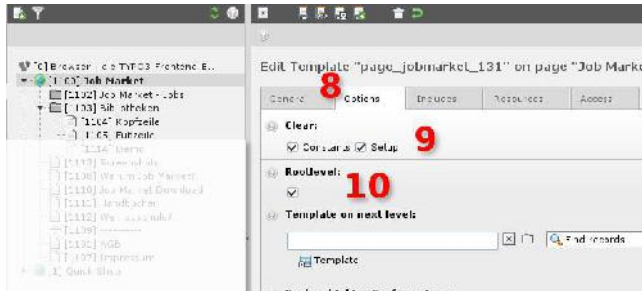

Illustration 9: TypoScript tab [Options]

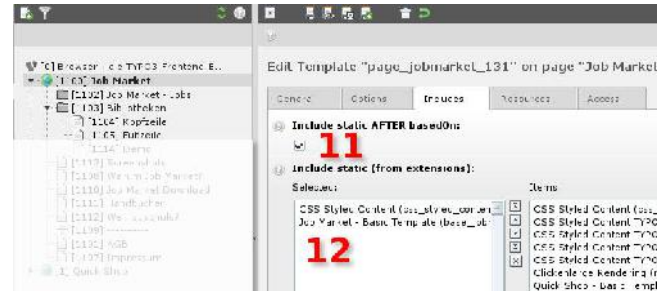

Illustration 10: TypoScript tab [Includes]

Modul: Web > List

1. Page tree: Job Market
2. Edit area: Icon for new records
3. System Records > template
4. Select tab [General]
5. Field [Template title]: page_jobmarket_001¹
6. Field [Website title]: Job Market"
7. Field [Constants]: Please paste the code snippet from the next page into the field area and adapt the values to your needs.
8. Edit area: Select tab [Options]
9. Enable fields: [x] Constants, [x] Setup
10. Enable fields: [x] Rootlevel
11. Select tab [Includes]
12. Enable field: [x] Include static templates AFTER basic template
13. Include static templates
CSS Styled Content (css_styled_content)
Job Market - Basic Template (base_jobmarket)

¹ Format should be: type_nameOfThePage_idOfTheTemplate

TypoScript Snippet

```
myConst {
  host = http://my-domain.com/
  client {
    name = The name of my client
    seo {
      default {
        // Default value for HTML head meta tag keywords
        keywords = Job Market
        // Default value for HTML head meta tag description
        description = Job Market - Jobs offered by domain.comfrontend-engine
      }
    }
  }
  pages {
    root = 1
    libraries = 2
    libraries {
      header = 3
      footer = 4
    }
  }
  paths {
    res = EXT:base_jobmarket/res/
    html = EXT:base_jobmarket/res/html/
    css = EXT:base_jobmarket/res/html/css/
  }
  files {
    html {
      template = index.html
      css = basic.css
    }
  }
  dims {
    header_image {
      maxW = 210
      maxH = 420
    }
  }
  words {
    // HTML a href title tag for menu item rootpage
    title_tag_rootpage = Home of Job Market
  }
}
```

Please clear the TYPO3 cache.

Result I/II

Illustration 11: Result in the frontend

This is the current result in the frontend.

Because we didn't add any content and any image, the areas for the header, the header image and the footer are empty. We will add content and image in the next step.

Header, Header Image and Footer

We will add the header, the header image and the footer.

Header

1. Page tree: Job Market > Libraries > Header
2. Edit area: Add a new record
3. Create a new content element > Pagecontent
4. Tab [General]
5. Field [Header]: [Header]
6. Field [Type]: Hidden
7. Tab [Text]
8. Field [Text]: Job Market
9. Save the form

Header Image

First we download the header image, second we upload it as a page resource.

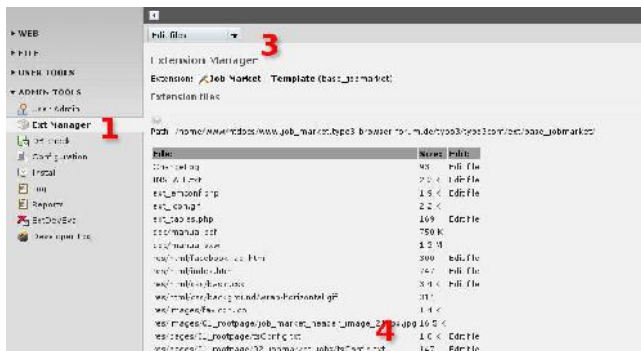

Illustration 12: Download the header image from the extension directory

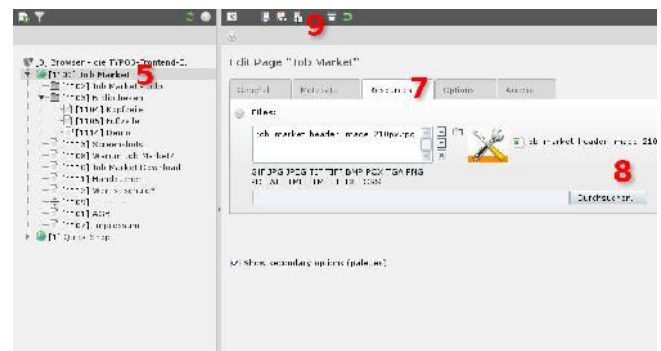

Illustration 13: Load up the header image to the page properties of the root page

1. Modul: Admin tools > Ext Manager
2. Edit area: Select this extension: Job Market Template
3. Pull down menu: [Edit files]
4. Click on the path: res/images/01_rootpage/job_market_header_image_210px.jpg
Save it on your computer.
5. Page tree: Job Market
6. Edit area: Page properties
7. Tab [Resources]
8. Browse for the image
9. Save the form (upload)

Footer

This has the same steps like the header above.

1. Page tree: Job Market > Libraries > Footer
2. Edit area: Add a new record
3. Create a new content element > Pagecontent
4. Tab [General]
5. Field [Header]: [Header]
6. Field [Type]: Hidden
7. Tab [Text]
8. Field [Text]: This is my footer
9. Save the form

Please remove TYPO3 cache.

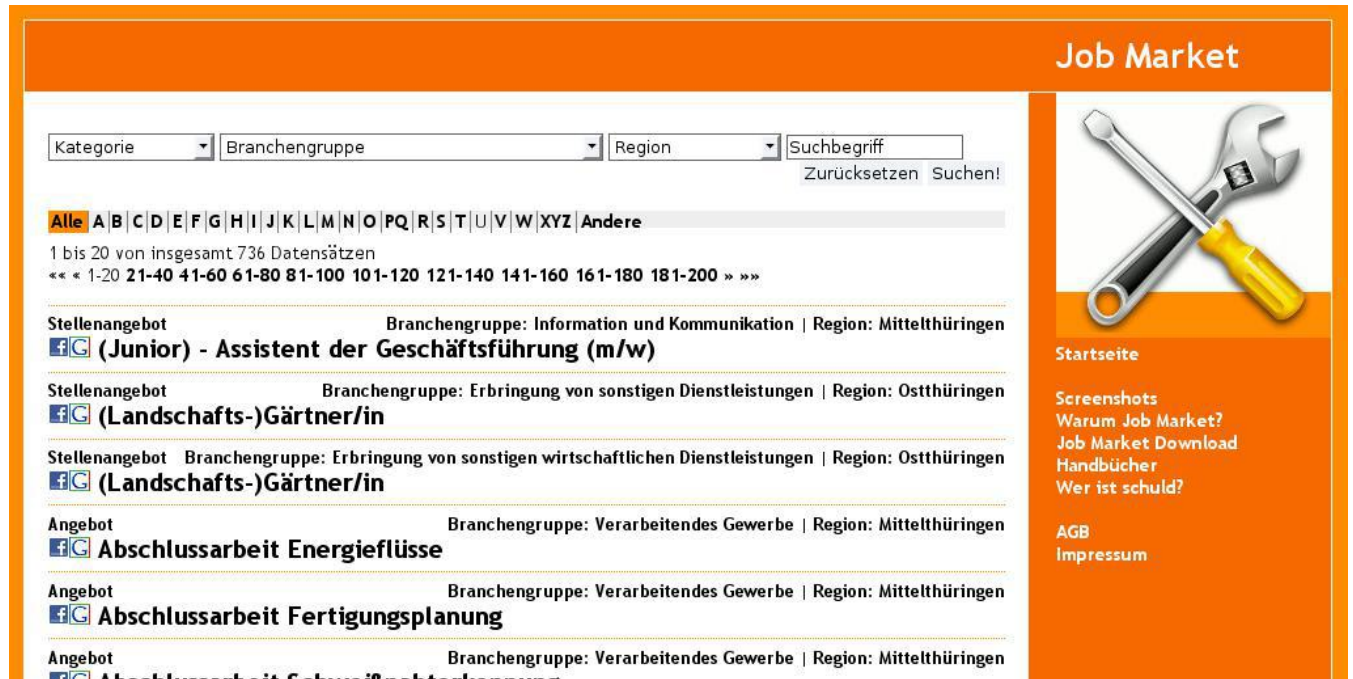

Result II/II

Illustration 14: The template in the frontend

1. Menu
2. Header
3. Header Image
4. Footer

Illustration 15: This is our template extended with the extension Job Market and with some jobs.

Now you can install the Job Market.

Manual Installation

How to install the Shop is reported in the manual of the Job Market Extension (extension key: job_market).

See

- Repository: http://typo3.org/extensions/repository/view/job_market/current/
- Manual: http://typo3.org/extensions/repository/view/job_market/current/info/?tx_terfe_pi1%5BdownloadFile%5D=doc%252Fmanual.pdf

Adapt HTML and CSS

You can adapt the HTML code, the CSS and the TypoScript to your needs.

HTML

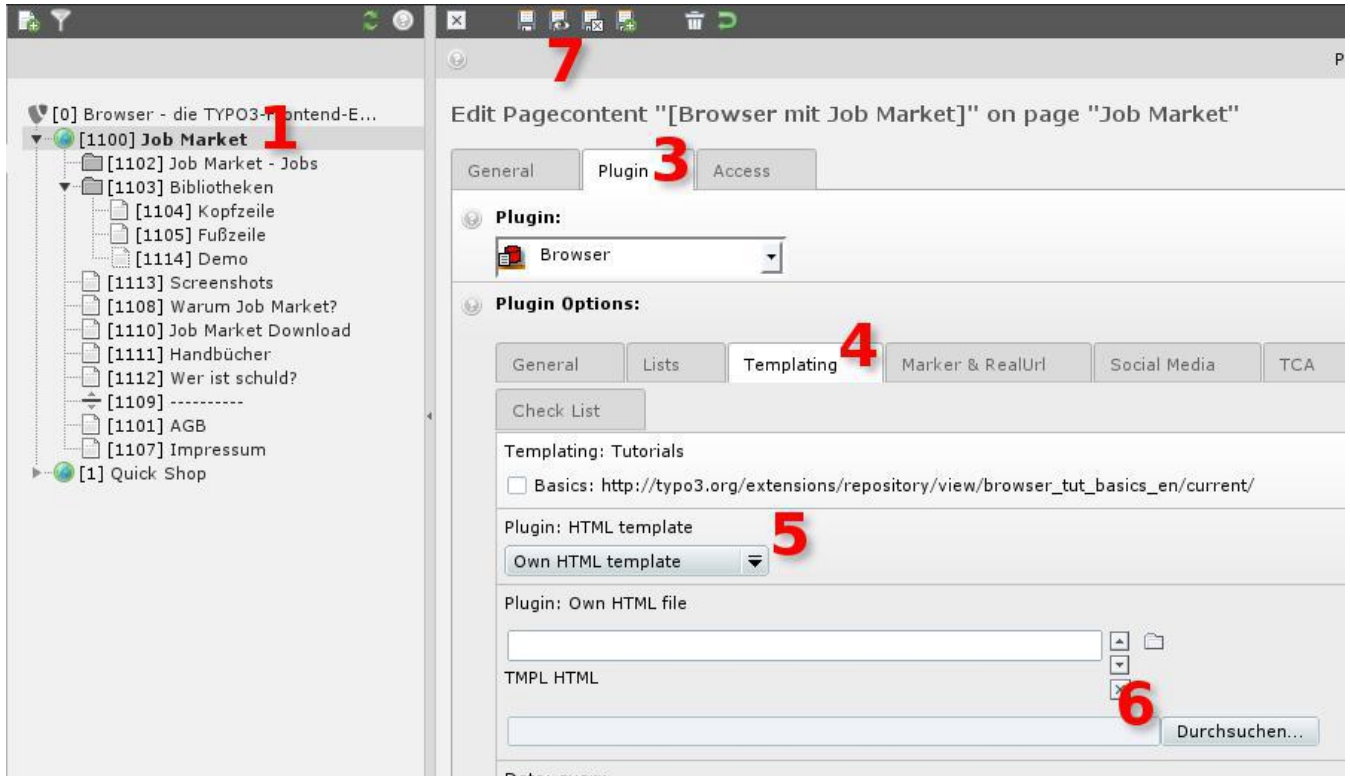

Illustration 16: Use your own HTML template

1. Page tree: Job Market
2. Edit area: Select the Browser plugin
3. Tab [Plugin]
4. Tab [Templating]
5. Field "Plugin: HTML template": [Own HTML template]
6. Browse for your HTML template on your computer
7. Save the form

CSS

Adapt the properties in the TypoScripT.

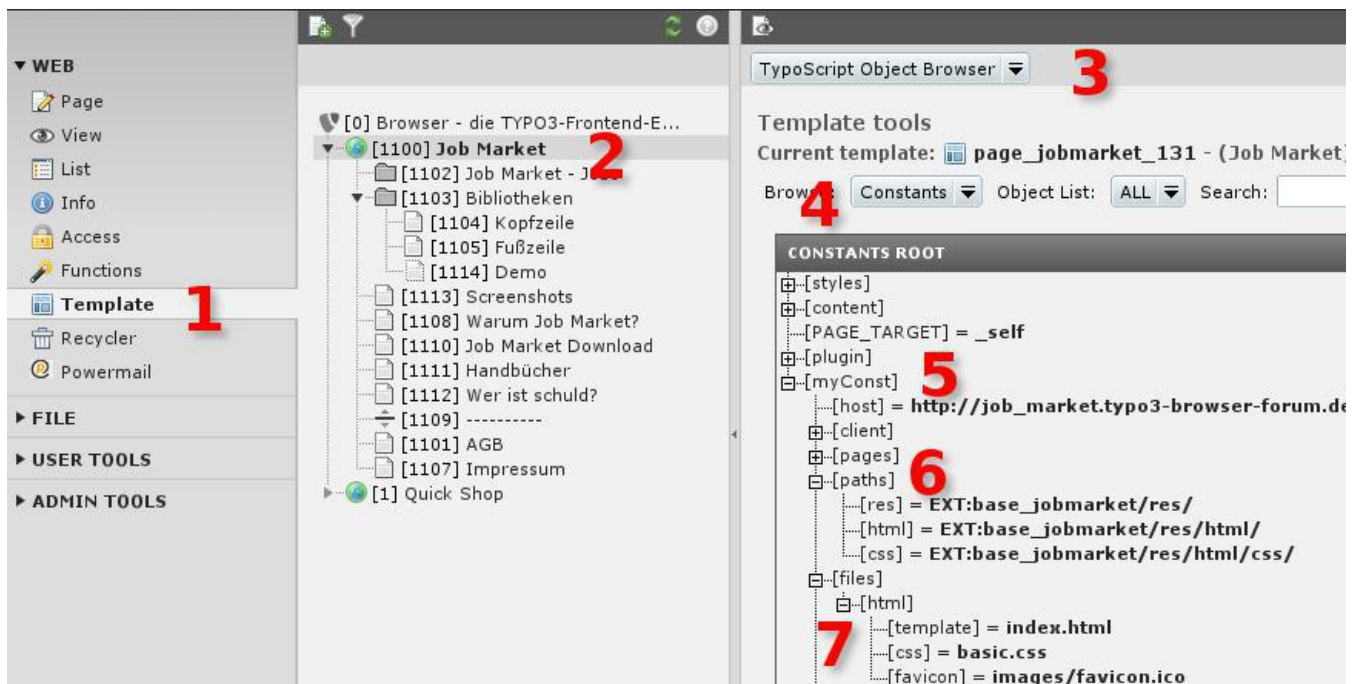

Illustration 17: Use your own CSS stylesheet

1. Modul: Web > Template
2. Page tree: Job Market
3. Edit area: Pull down menu:[TypoScripT Object Browser]
4. Menu Browser: [Constants]
5. Click the plus icon of the element [myConst]
Click the plus icon of the elements [paths] and [files] > [html]
6. Adapt the path to your HTML file or to your CSS file to your paths
7. Adapt the name of your HTML file or CSS file to your file names

Helpful suggestions

If you have helpful suggestions, feel free to contact me: Dirk Wildt <http://wildt.at.die-netzmacher.de>.

To-Do List

Nothing to do.

Further Information

About the plugin icon

Illustration 18: The logo

The concept of the icon:

- The screwdriver and the adjustable wrench should symbolize work - pre-condition for a job.
- The colour of the stripe, orange, is the one of the TYPO3 colours, and the main colour of the corporate design of the Netzmacher GbR (<http://die-netzmacher.de>), which developed this extension.

Other extensions published by Die Netzmacher

-  Browser - the TYPO3-Frontend-Engine. The Browser is the fast way for your data to the TYPO3 frontend. It displays content from related tables. You need 1 line TypoScript for a result list with a search form, a record browser and an a-z browser. Images are wrapped self-acting. SEO, Search Engine Optimization, is integrated. <http://typo3.org/extensions/repository/view/browser/current/>
-  Browser for Virtual Civil Services - List views and single views for the extension Virtual Civil Services (civserv) . It supersedes smarty and enables SEO - search engine optimisation -, Real URL and the TYPO3 cache management. It is out of the box. It You can edit the views by TypoScript. You can add fields and whole views. http://typo3.org/extensions/repository/view/browser_civserv/current/
-  Green Cars (Grüne Autos) - Database optimized for ecological cars. It is a case study and demonstrates, how to get a complex database with the Browser in three hours only. http://typo3.org/extensions/repository/view/green_cars/current/
-  Juridat - Database for Juridical Data. Juridat provides a juridical data base with backend functionality. Juridat is out of the box. It is a teamwork with the Browser. <http://typo3.org/extensions/repository/view/juridat/current/>
-  logical_form: A frontend plugin for evaluating forms. I.e you can evaluate mail addresses. http://typo3.org/extensions/repository/view/logical_form/current/
-  Majordomo: For subscribing to and unsubscribing from a majordomo mailing list. <http://typo3.org/extensions/repository/view/majordomo/current/>
-  Quick Shop (extkey: quick_shop): The fastest shop in the history of TYPO3. Install it with one mouse click only! Quick Shop is based on the Browser and powermail. http://typo3.org/extensions/repository/view/quick_shop/current/
-  Manage your Postfix user accounts with TYPO3. This extension provides a database connected with fe_users and an autoresponder. You can manage the data with backend forms only. <http://typo3.org/extensions/repository/view/postfix/current/>
